Product Description:

The Edge Square wall mounting fixture with 1x36W TC-F or 1x18W TC-L compact fluorescent lamps belongs to a decorative energy saving collection of fixtures. The basic design idea of this range is mainly to give the users the possibility to change and control the direction of light and to change the colour and create different spheres on the wall. Herewith we bring a decorative lighting solution with energy saving performance and the possibility to play with the direction of light output. The Edge Square mounting fixture has an adjustable decorative shield for direct and indirect lighting. The possibility to change colour in the shield makes it suitable for colour matches with the interior designs. Standard colours of the shield are Opal, cobalt blue, yellow, green and red. The Edge Square range includes also several other shield designs; slotted aluminium, patterned steel and dimpled or prism glass. Dimmable versions are also available. The Edge range also includes several other wall uplighters, floor standing and pendant models.
