Product Description:	
<p><i>The design of this product was based around the new 7w compact fluorescent lamp from Sylvania, the Micro Lynx-F lamp.</i></p> <p><i>This lamp provided an opportunity to create a surface mounted bulkhead of very shallow dimensions, giving the impression of being recessed where a recessed product would not be possible. This new generation of slim luminaries includes an integral electronic ballast and is IP55, suitable for both interior and exterior use.</i></p>
